

Molders Choice **LOW-HOPPER ALARM**

Eliminates Shutdowns Caused by Empty Hoppers.

Required for Manual Loading.

Recommended as Backup for Automatic Loading.

- Capacitive Proximity Sensor mounts through hopper wall to sense material level
- Bright light signals alarm situation.
- Loud Audio Alarm circuit can be turned off or on as second signal of alarm situation. Alarm automatically resets when circuit is on.
- 10' Power Cord
- 6' Sensor Cord

**Can also be set up as
Grinder FULL CATCHPAN ALARM**

Change to a normally-closed proximity switch and use the Low Hopper Alarm to detect an over-full catchpan.
